EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Hans-Peter Hoffmann on February 2, 2005.

The application has been amended as follows: Claims 34-36 have been canceled.

Allowable Subject Matter

2. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 2-33, 37-43, and 52-60 are found to be in condition for allowance.

Reasons for Allowance

3. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a method of compressing first and second data sets comprising the steps of generating data representing differences between the first and second transform coefficient sets includes: *"estimating the differences between the first and second transform coefficient sets to provide motion vectors, applying the motion vectors to the first transform coefficient set to produce a prediction of the second transform coefficient set; and subtracting the prediction from the second transform coefficient set resulting in a set of prediction errors"* further including *"...predicting the second transform coefficient set by applying the motion vectors to the first transform coefficient set; subtracting the predicted second transform coefficient set from the second transform coefficient set to obtain prediction errors. . ."*

It is noted that the closest prior art of record (Lennon et al. US 5,937,097) teaches a similar compressing method, however, Lennon fails to particularly teach or suggest the steps quoted above and specified in the claims.
